

STENOTAPE 915

"FULLY TRANSISTORIZED"

CARTROMATIC

**Instant, Automatic Loading
Makes It Easier and Faster
To Get Started**

On many machines, before you can start dictating or transcribing, there are levers to pull — doors to open — tapes to thread — or connections and adjustments to make.

Not so with the CARTROMATIC. All you do is drop the magnetic tape cartridge in place — and start. There's no fumbling, no threading — no adjustments. Fingers never touch the tape. It's simple.

**45 Minutes of Dictation Time on
each cartridge.**

Only \$249.95

**StenOtape 915 CARTROMATIC . . .
complete with microphone, cradle,
cartridge loaded with unbreakable
MYLAR tape.**

915 A Complete with Foot Pedal (FP-974)
and Earphone (EP-938)

915 B Complete with Fingertip Control
(HC-973) and Earphone (EP-938)

**Any of the above combinations . . .
\$249.95**

DICTATING CONTROLS ARE AT YOUR FINGERTIP

This man's thumb is on the Start/Stop lever — a slight pressure activates it. When the "REC" button at the left is touched, the red light above glows softly and you know StenOtape CARTROMATIC is taking your dictation. To review what you have said, touch the Review button at the right.

On many other machines it is necessary to keep reaching over to the machine to find the right button or lever . . . a nuisance!

TWO SPEAKERS

One speaker is in the microphone for personal review of the material you've dictated. For greater volume and conference use, switch on the more powerful high-fidelity speaker in the machine.

DICTATE AS YOU NORMALLY SPEAK

There are no distracting adjustments to interfere with your thoughts. Your work gets done faster. You may hold the microphone in your hand — or if you prefer, lay it on the desk — or even leave it in its holder on the machine. No volume setting is required. The supersensitive microphone will pick up your normal conversational voice — crystal clear.

15 seconds before the end of the tape, a warning buzzer sounds.

Your dictation can be free of errors. To change a word, or a paragraph, back-space on the microphone just to the desired place — and dictate again. All previous dictation is automatically erased.

Fully transistorized, dictating and transcribing may be done at the very moment you wish.

Sten-O-Tape 915, All Transistorized Tape Cartridge

Dictating/Transcribing Machine

Only the world's first complete Tape Cartridge dictating/transcribing machine could offer all these outstanding operating and performance features: Solid state, all transistor shock-mounted chassis • Fool-proof loading, dictating and transcribing • Exclusive variable Tone Control • Illuminatic automatic time lapse indicator and 15-second warning buzzer • All function controls in microphone • Two speakers — one in microphone, one in master cabinet • Automatic Volume Control • Simplified Controls • Compact cabinetry in high impact modern design • Fully guaranteed • Manufactured to U.L. Specifications.

STENO TAPE
OVER 750,000 ARE IN USE
ALL OVER THE WORLD

SPECIFICATIONS

StenOtape CARTROMATIC 915

Chassis — All transistor, solid state; shock mounted; output 150 mw.

Tape-Speed — 1 7/8 IPS, Dual track
Power — 110-120 volt A.C. 60 cycle, with safety fuse. Power consumption approximately 30 watts.
Manufactured to UL specifications.

Cabinet — Handsome two-tone high-impact shock resistant Cyclocac.

Dimensions — 3 3/4" H x 11" W x 8" D.
Weight — 8 lbs.

Operating Time — 45 minutes
Capstan Drive

Fast-Forward rewind time — 140 sec.

Fast-Erase time — 140 sec.

Automatic-Stop Device with Buzzer
Automatic-Gain Control when dictating
Precision-Time indicator

Inputs (4) — Foot Pedal or Finger-tip Control

Telephone Microphone

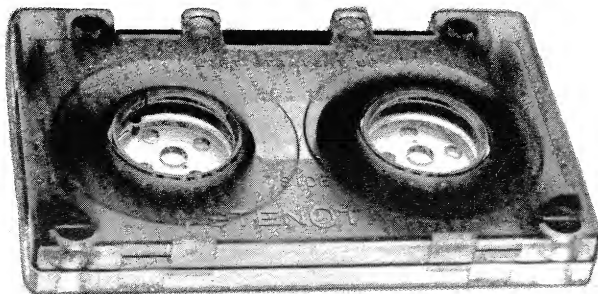

Earphone

Microphone

Output — Monitoring

CARTR-O-MATIC

MAGNETIC TAPE HAS BEEN PROVEN BEST

TRANSCRIBING IS MORE COMFORTABLE — MORE ACCURATE

Secretaries are pleased to transcribe from the CARTROMATIC. They like the instant automatic loading of the cartridge — the absence of fuss in getting started. The voice comes through with amazing clarity — including the "ing", "ed" and "s" sounds which are lost on so many other machines.

She can also "tune" the voice for more comfortable listening — and can control volume.

Whether you dictate in a loud tone or a whisper, the CARTROMATIC compensates and records properly because of its automatic voice levelling. The same machine may be used for dictation and transcription.

STENOTAPE RV 4-10

Over 650,000 in use

PORTABLE TAPE DICTATING,
TRANSCRIBING, CONFERENCE MACHINE.
10 HOURS OF OPERATION
ON 1 PATENTED SELF LOADING REEL.

"FULLY TRANSISTORIZED"

RV 4-10: This new and additional model is available with full controls (Back space to play, Stop, Start) on microphone at

\$279.95

RECORD conferences

4-10 is ideal for conferences because of its long play and sensitivity—will pick up sound 30 ft. away. StenOtape will start and stop automatically along with the speaker, by use of the Automatic Voice Control.

DICTATE

Simply use the T-25 remote control microphone and every word you dictate and every inflection of your voice will be precisely reproduced.

TRANSCRIBE

Your secretary has the choice of finger tip remote control or foot/pedal control but, either way, she will hear your every word with unusual clarity that only the Geloso StenOtape 4-10 can give

FEATURES

- High Grade Silicon transistors
- Guaranteed trouble-free electronic system.
- 10 Hours of operating time.
- 3 speeds—15/16, 17/8, 3 3/4 I. P. S.
- Outputs: Monitoring, earphone, external speaker, amplifier, etc.
- Inputs: Remote control, microphone, telephone pick-up, radio, etc.
- Shock proof case
- Digital counter, spot reference
- Built in handle for portability
- V. U. Meter
- Compatible with all standard recorders
- Exclusive Geloso Patented self loading reels.
- Frequency Response $40 \div 12,000$ cyl at $3\frac{3}{4}$ I. P. S.
- Signal to noise Ratio = better than 50 db.
- Wow and Flutter = Less than .2%
- Erase = -58 db.
- Power Output = 2.5 Watts
- Special Hi Fi built in speaker
- 5-Transistors—High Grade Silicon
- 9-Diodes
- AC Bias = 75Kc.
- Output Impedance = 6 Ohm
- Power Consumption = 32 Watts
- Power requirements = 117v, 60 cyl. AC only.
- Dimensions = 5" x 12" x 11"
- Weight = 12 lbs.

PLAYBACK

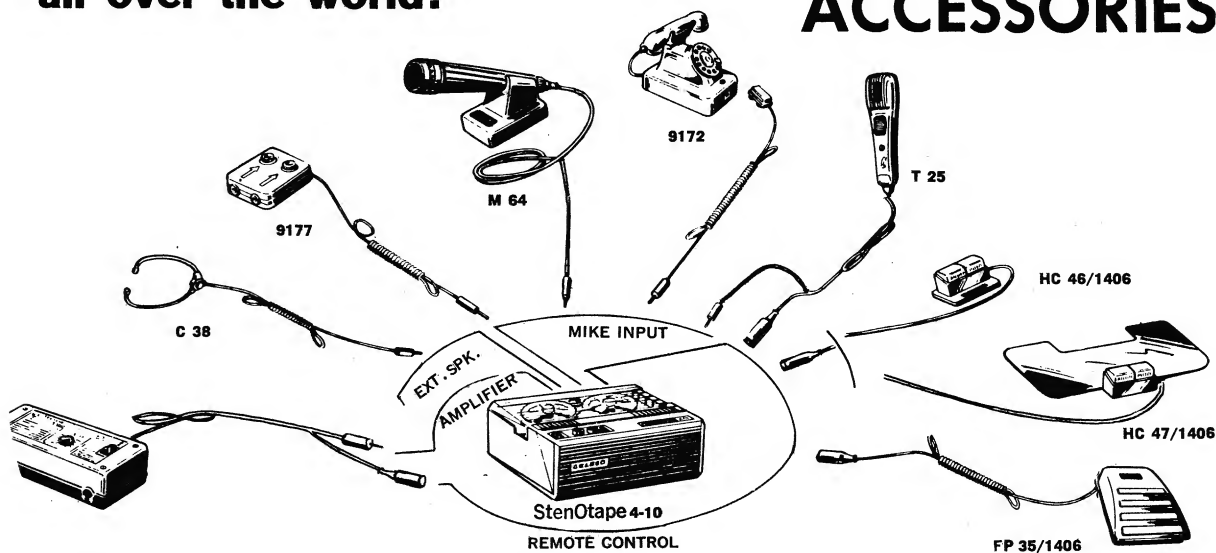

StenOtape 4-10

Complete with Geloso #T-25 Remote Control Hand Microphone—Geloso patented 5" self loading reel with tape and one self loading empty reel. Consumer **\$279.95**

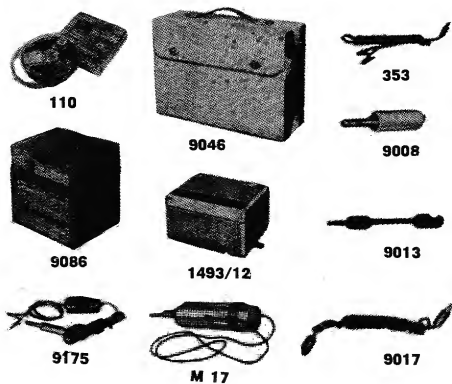

all over the world!
